Hi Bob,

Back in October we talked about EPA's pretreatment sampling inspection at Poly - chromium result was 5.4 mg/l.

I requested a copy of their IDP, and 5 years of sampling data.

You thought best to provide information by mid to early December.

I was following up.

Hi Joe,

They have not had any correspondence with the SWSC since your letter went out.

Can you be more specific regarding data?

Thanks,

Bob Weaver

Hello Bob.
Can you send me the data for Poly.
Also, did they share the EPA results?
Thanks.
